

# Maximizing the power of Trimble Prolog® with ProDrawingLog

ProDrawingLog monitors Prolog File Management System (FMS) for drawing files and creates Drawing Package and Drawings & Specs records automatically.

## ProDrawingLog

by SBN Consultants Inc.

### FEATURES:

- ▶ Works with Prolog Converge on Trimble Sky and on-premise
- ▶ Customer specific file naming convention
- ▶ Automatically creates Drawing Packages and Drawings & Specs records
- ▶ Automatically links files to drawing revision records

### BENEFITS:

- ▶ Improve resources productivity
- ▶ Reduce data entry time and number of 'clicks'
- ▶ Data consistency

Construction Managers and Contractors receive hundreds of drawings and specifications during the life cycle of a project. Tracking these documents in Prolog and linking them to records require many hours of project resources time.

ProDrawingLog automates this process and improves resources productivity within a project.

### How does ProDrawingLog process work?

- Establish a custom drawings/specs file naming convention
- Setup a folder in Prolog File Management System
- Upload drawings/specs files to this folder
- ProDrawingLog creates Drawing Package and Drawings & Specs records automatically
- Links files to drawing revision records
